

Modular Island Unit

The Modular Island Unit is designed to provide a safe structural half height support frame to mount washtrough onto. When washtroughs are required to be fitted in the middle of a room or projecting out from a wall, the steel modular island unit can be bolted to the ground. The void between the two troughs is designed to hide all pipework and can contain the ONVO multifeed soap container. Access can be either from beneath the washtrough or via a removable lid on the top of the unit. The frame can then be clad in plywood and finished in whiterock, tile etc to match the rest of the room.

| Island Code | Washtrough Code | Island Overall Length | Washtrough Length | Users |
|-------------|-----------------|-----------------------|-------------------|-------|
| 1202WIS | 1202W/C | 1566mm | 1200mm | 2 |
| 1802WIS | 1802W/C | 2166mm | 1800mm | 3 |
| 2402WIS | 2402W/C | 2766mm | 2400mm | 4 |
| 3002WIS | 3002W/C | 3366mm | 3000mm | 5 |

*bespoke lengths are also available

Technical Data

| | |
|-----------------------|--------------------------------|
| Warranty | 10 years from date of purchase |
| Island frame material | Powder coated steel |

Installation Requirements

Secure fixings into the floor through holes in the floor standing steel frame.
